28th International
Workshop on Smart Antennas

September 16-18, 2025 | Erlangen

WSA 2025

Call for Short Papers, Posters & Presentations

Committee

General Chair:
Norman Franchi

Honorary Chairs:
Wolfgang Utschick
Josef A. Nossek

TPC Co-Chairs:
Vahid Jamali
Laura Cottatellucci
Wolfgang Gerstacker

Presented by and hosted at

FAU

6G VALLEY

Co-Sponsorship by

IEEE

IEEE ComSoc
IEEE Communications Society

Patrons

Förderkreis Mikroelektronik

The **28th International Workshop on Smart Antennas (WSA 2025)** provides a forum for presenting the most recent research on smart antennas and related theoretical and technical aspects in modern wireless communication systems. In addition to the original call for regular full-paper submissions (6 pages), the Technical Program Committee (TPC) of WSA 2025 is pleased to announce three additional calls:

1. Call for Short Papers on Recent Research Results

The WSA 2025 is opening the Call for Papers on **short papers presenting recent research results**. This track is designed to provide researchers with an opportunity to disseminate new findings that have emerged since the regular paper deadline and that contribute significantly to the scientific discourse within the scope of the conference.

Submission Period:	June 4 – July 14, 2025
Notification of Acceptance:	July 28, 2025
Camera-Ready Deadline:	August 17, 2025

Submissions (pdf via EDAS) may take the form of either
- an **extended abstract** (2 pages), including key results, or
- a **full short paper** (4 pages)

All submissions must be aligned with one of the official WSA 2025 tracks. Upon acceptance, authors of extended abstracts will be required to submit a final version as a full 4-page short paper. Accepted short papers will be **published in the official conference proceedings** and made available through **IEEE Xplore®**.

2. Call for Posters on Recent Research Results

The WSA 2025 Technical Program Committee invites submissions to the Call for **posters on recent research results**. This call is particularly aimed at **PhD students** and encourages the dissemination of **early-stage research ideas, emerging concepts, and preliminary results** that are not yet fully developed for short paper submission or are intended for future publication elsewhere.

Submission Period:	June 4 – August 11, 2025
Notification of Acceptance:	August 17, 2025

Submissions is:
- a **one-page abstract** (DIN A4, font size 11, 250 to max. 300 words)
- You need to bring a **poster** (DIN A0) for the conference

All submissions must be aligned with one of the official WSA 2025 tracks. The design of the poster can be chosen freely/individually for submission. Only the size (DIN A0) is mandatory. No template is provided for the one-page abstract either. The abstract (DIN A4) must contain 250 to a maximum of 300 words in addition to the title and author details and needs to be uploaded as pdf in EDAS. Upon acceptance, a poster template with a uniform WSA frame will be provided by the TPC. Please note that **accepted posters will not be published or included in IEEE Xplore®**, allowing authors to preserve future publication rights.

3. Call for Presentations of Related Published Scientific Work

As part of the expanded submission opportunities for WSA 2025, the TPC invites submissions for **presentations of previously published scientific work**.

Submission Period:	June 4 – August 11, 2025
Notification of Acceptance:	August 17, 2025

Submission is handled via EDAS

https://edas.info/newPaper.php?c=33686

Submissions (pdf via EDAS) should include the following elements:
- A title (which may differ from the original published version)
- Assignment to one of the WSA tracks
- A brief explanation of the contribution's relevance to WSA and the chosen track
- A link or DOI to the published paper or arXiv submission
- A PDF version of the author's manuscript (in case, the work will be published soon and is not yet available online)

Submissions must align thematically with one of the WSA conference tracks and will be evaluated accordingly. This call specifically targets **presentations of papers that have already been peer-reviewed and published or are about to be published soon**, offering an opportunity for authors to share and discuss their findings with the WSA community. Please note that contributions submitted under this call will **not be included in the official conference proceedings or published in IEEE Xplore®**.
